Forecast for Friday 02 Jul 2021

Weather: Low cloud and fog affecting valleys in the early hours, particularly in western areas. This will quickly lift and clear through the morning, allowing for a day of sunny intervals. The risk of the odd shower developing through the afternoon, mainly in northern and eastern locations. Turning cloudier through the late afternoon and into the night.

Chance of cloud free mountain/hill tops above 600m: 80% as the low cloud lifts, otherwise 100% through the day.

Visibility: Low cloud and fog affecting the valleys up to 300-400m and reducing visibility during the early morning, but clear skies above this. The low cloud will lift through the morning and allow visibility at the surface to improve as it does so. Cloud throughout the afternoon and evening staying above the summits, with good visibility of surrounding hills.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Care should be taken if out early owing to the poorer visibility. However, although it will be a cloudy and foggy start to the day at the surface, it is important to remember that intervals of strong sunlight with very high UV levels will develop later on and that skin protection will be required.

Recent rainfall: measured at Neuadd: altitude 353m

Forecast for Saturday 03 Jul 2021

Weather: Cloudy start to Saturday with showers soon moving cross the park. These showers could often be heavy, with the risk of thunder and hail, and will continue throughout the morning and afternoon. Cloud will be more widespread in the morning, while more associated with showers in the afternoon, which may allow occasional brighter spells to develop in between. The showers will ease off into the evening and overnight.

Maximum wind: Wind on the summits southerly 15 mph, with gust speeds increasing to 25 mph during the afternoon.

Chance of cloud free mountain/hill tops above 600m: 60% throughout the day.

Visibility: Cloud bases largely above the summits to begin the day, but increasing amounts dropping to 300-400m associated with the showers. Very poor visibility in the showers themselves.

Temperature: **Valleys:** Plus 13 Celsius, rising to plus 19 Celsius.
At 600m: Plus 9 Celsius, rising to plus 12 Celsius.
Freezing level: Above the summit all day
